# [NY-04] Child Tax Credit with Democrat affiliation plus opposing statement

In 2021, the Child Tax Credit was expanded to provide more money to families with children. Supporters like Democrat Laura Gillen argue that the expansion helps families put food on the table and pay for childcare. They believe this financial support is crucial for reducing child poverty, improving children's health and educational outcomes, and stimulating economic growth by increasing consumer spending. However, some critics say that this expansion has significantly increased government spending, contributed to the national debt, and could lead to higher taxes in the future to cover these costs. Based on this information, do you support or oppose the expanded Child Tax Credit?
